CREATE IBM WATSON IOT PLATFORM AND DEVICE

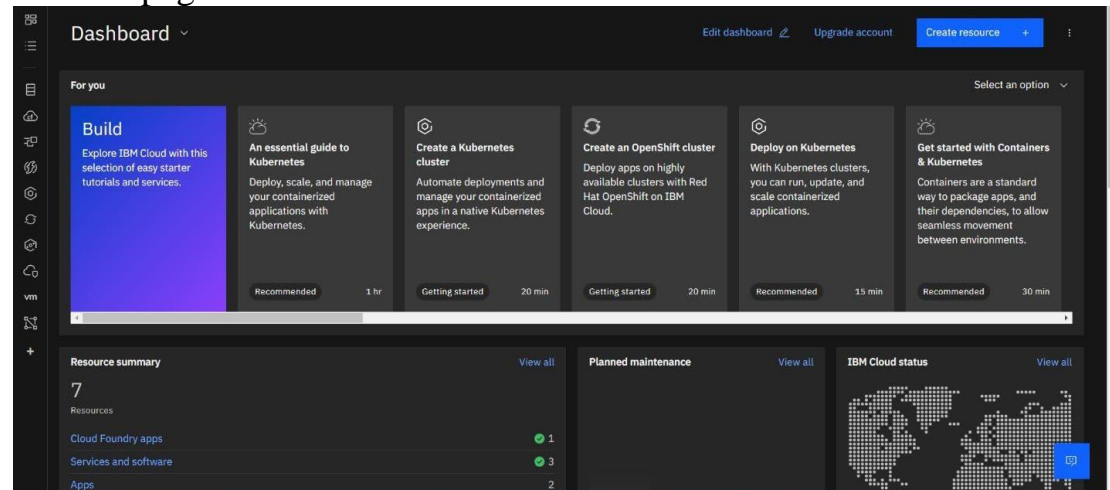

1. To create the IBM Watson IoT platform and device

STEPS:

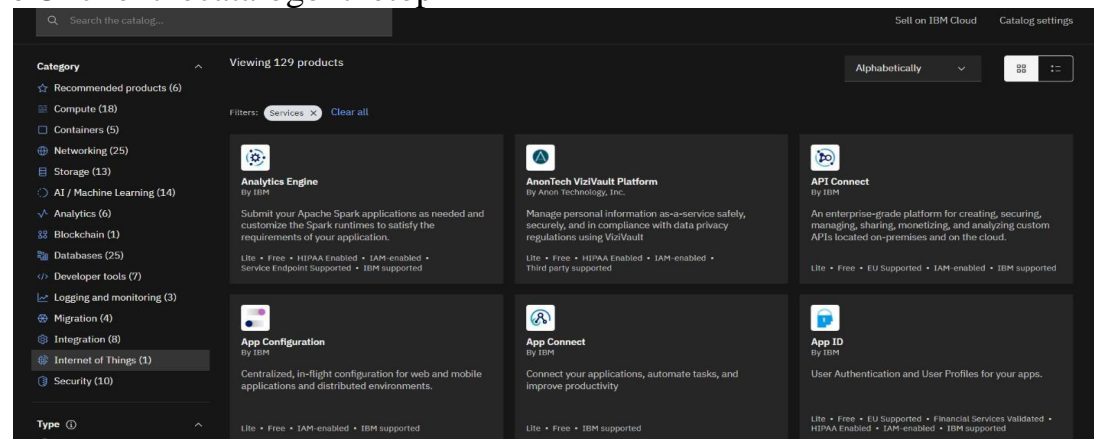

1. create an IBM cloud account with the individual IBM ID and password

2. Homepage of IBM cloud

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

Internet of Things Platform

This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.

Let's get started with IBM Watson IoT Platform

Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.

[Launch](#) [Docs](#)

Ready for the next level?

IBM Watson IoT Platform Journey

☒ Lite

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

- Free

☐ Non-Production

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

- Starts at \$900 per month

☐ Production

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

- Includes IBM Service & Support

9. manage is for launch, plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IOT with other services

N/A

Lite plan services are deleted after 30 days of inactivity.

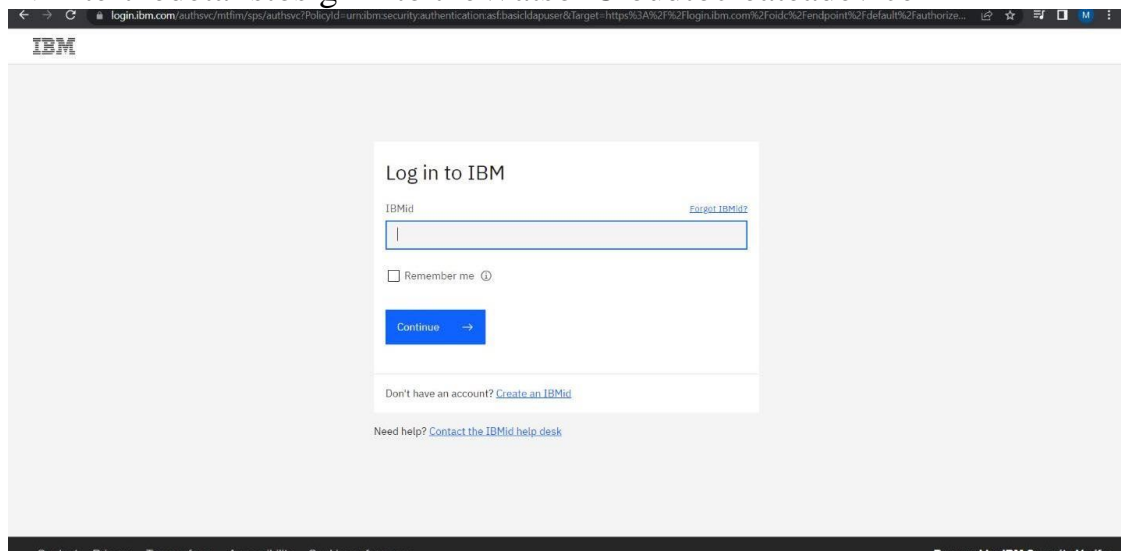

Change pricing plan

Plan	Features	Pricing
Lite	<ul style="list-style-type: none"> Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed 	Free

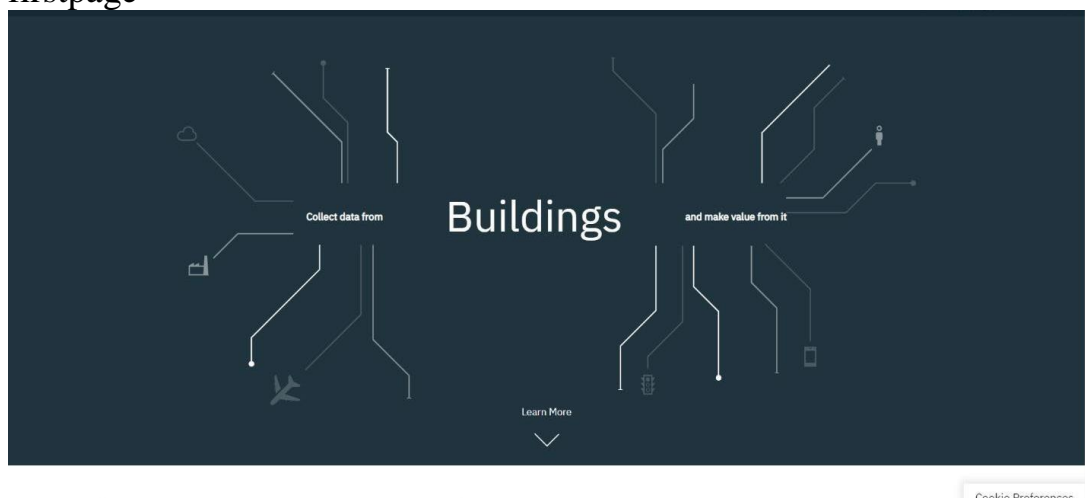

10. Click on the launch button in the manage tab, it will open to this

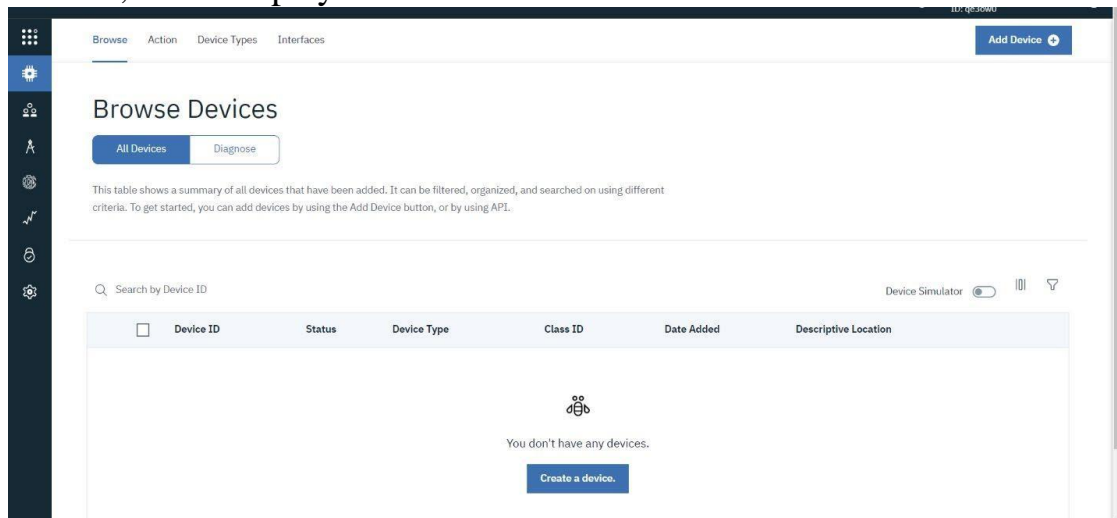

11. Enter the details to sign in to the Watson Cloud to create a device

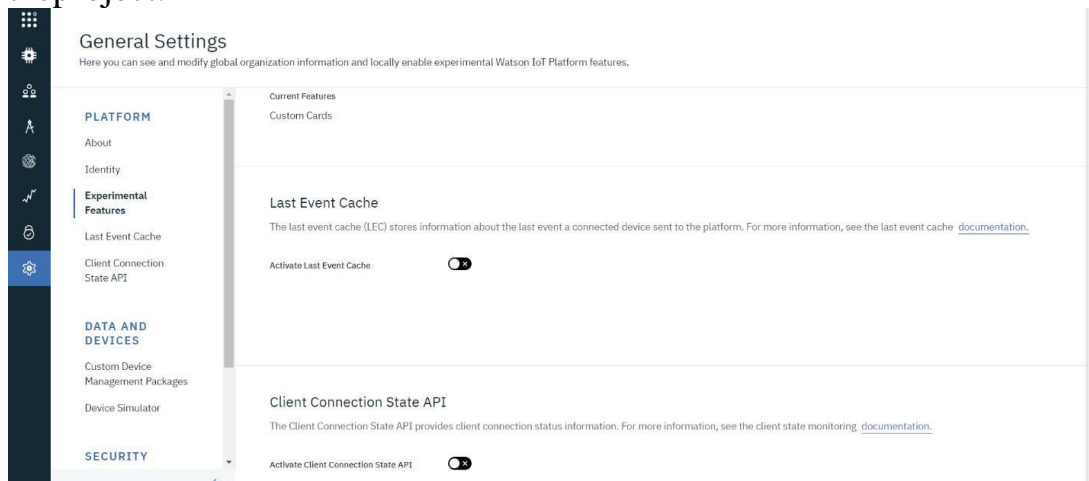

12. Once logged in the name will be displayed and it goes back to the first page

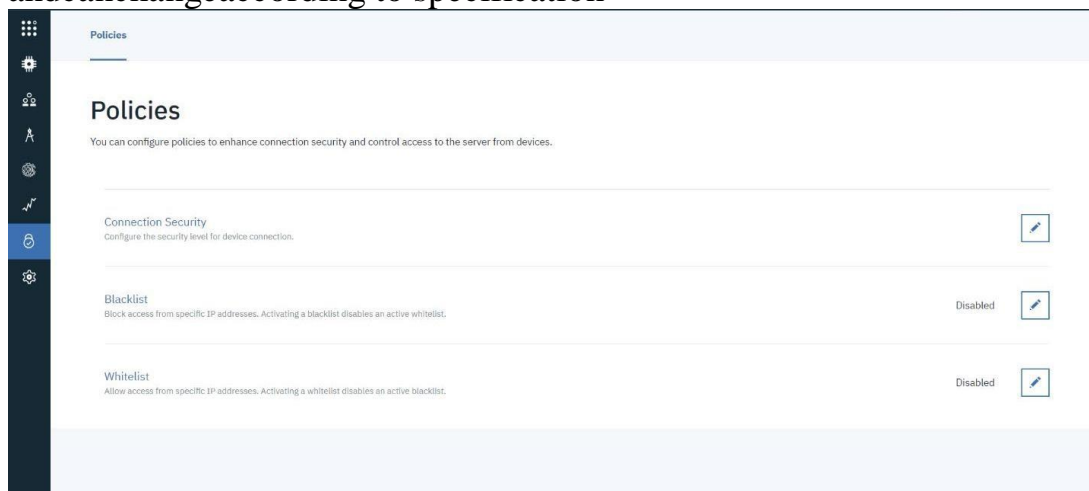

13. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

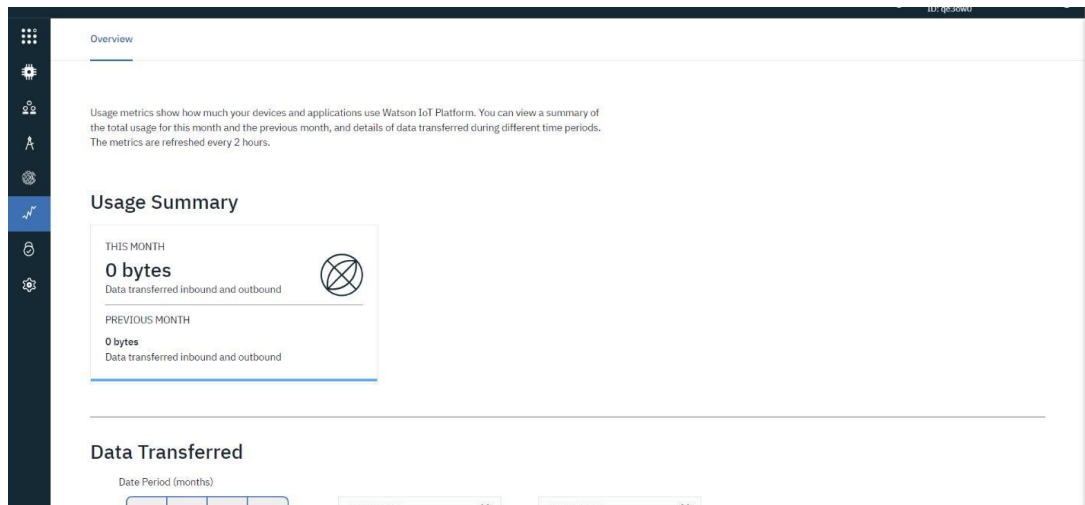

14. The setting tab is used to change the general setting if needed for the project.

15. In the security tab we can choose the type of security connection and can change according to specification

16. Usage gives the summary of how many bytes are used between the devices and the IBM cloud

17. The member tab is add the teams member to work in the platform

The screenshot shows the 'Browse Members' page. It includes a search bar and a table with one member. The table columns are Email Address, Name, Role, Added By, and Expires. The member listed is 'worldisfulofmeow@gmail.com' with the role of 'Administrator'.

Email Address	Name	Role	Added By	Expires
worldisfulofmeow@gmail.com	worldisfulofmeow@gmail.com	Administrator	-	-

18. This tab is used when you want to connect to some other platform and to integrate with other services.

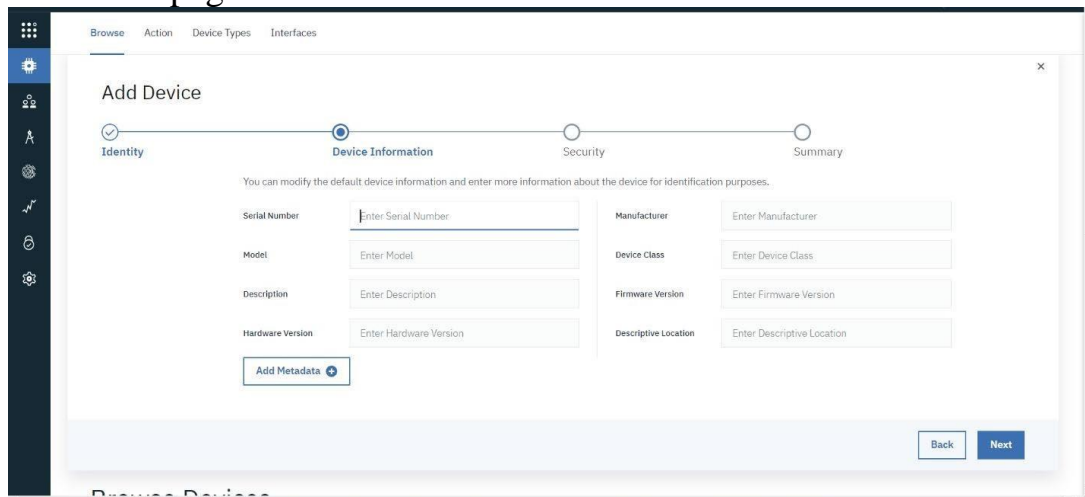

The screenshot shows the 'Browse API Keys' page. It includes a search bar and a table with no results. The table columns are Key, Description, Role, and Expires. Below the table, there is a message 'There are no API Keys' and a 'Generate API Key' button.

Key	Description	Role	Expires
0 results			

19. Click on the device tab and click on the add device button, then give the device type and device id and click next

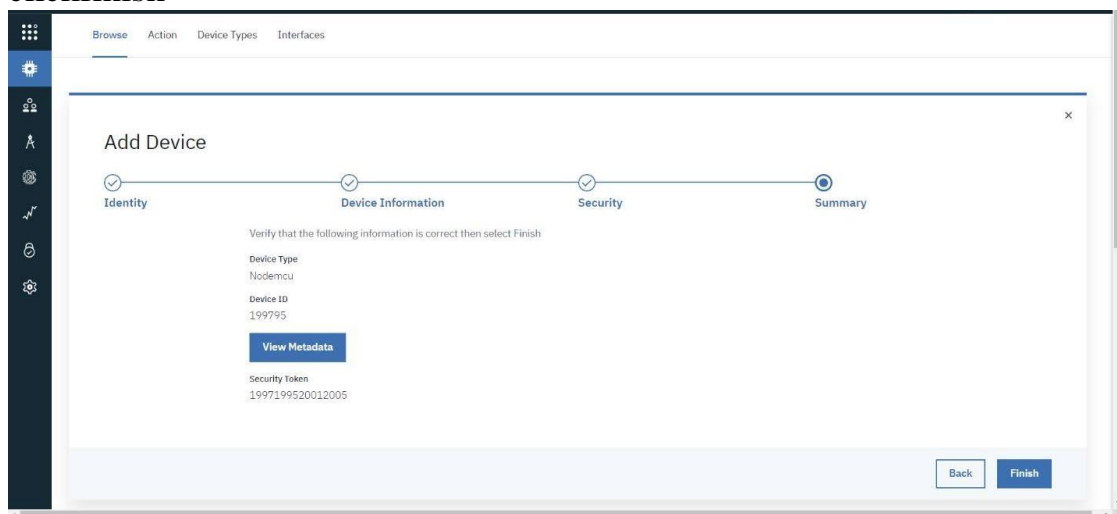

20. Thispage toenterextradetailsandofthe hardware

21. Clicking next it goes to the security where we do authenticationtokenid.

22. Clicking on next it goes to the summary of the device then click finish

23. The device credentials will be displayed with all the details

24. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

25. Clicking on the device tab we can now see the added device. Clicking on it will display the other details. It has different tabs like Identity, Device Information, State, and login. In a similar way, we can create a number of devices with a 50 per page limit as per the requirement of our project.

26. The Board will display a card for the project.

CONCLUSION:

An IBM Watson cloud for IoT and a device is created
